Mary Ann Benoit: Interior Designer/Energy Artist- The Visionary Behind Aligned Design[©]

Location: Alaska

Mary Ann Benoit, President of Northern Lights Home Staging and Design, has revolutionized the world of Interior Design, Virtual Design and Energy Art with her unique Aligned Design[©]system which has a foundation in her subliminal energy art. With accolades to her name, she's renowned for her unique transformative approach to Interior Design, both in Alaska and worldwide online.

Her Interior Designs are not just about aesthetics; they create magic by intertwining art, science, and energy with a foundation built on energy. She sculpts spaces that resonate with and support their inhabitants to be aligned with who they truly are. Her ethos? "When your space is better, you are better. When you are better, the world is better. And the world needs you". Her style? "Globally inspired, soulfully aligned." Using the lively color spectrum of global styles, combined with her energy-infused AI and fractal art collages with subliminal energy messages, Mary Ann's designs are more than just visually appealing; they're a testament to one's spirit and uplift and support you to reach your highest potential.

Drawing inspiration from her 30-year tenure as a wildlife biologist, nature's splendor is intricately woven into her designs. As Alaska's exclusive Certified Color Strategist, she elevates color choices to an art form using color science. Her energy art, rooted in sacred geometry, serves as a design foundation, resonating deeply with its beholders through subliminal supportive energy messages coming through layers of energy infused fractal art. Dive into her world with an Aligned Design consultation, which includes your personalized energy art portrait. And, for art aficionados, her creations are available on Pixels.com and other platforms.
